

OSCE Language for all Clinical Course Syllabi in Pre-Licensure Courses (MECN & BS program)

OSCE (Objective Structured Clinical Exam) Testing: An OSCE is a Skills Test and is an important component of ensuring safe patient care. At the completion of this course, an OSCE will be done as the final course skill examination in the 4th floor lab. There are **[fill in appropriate number for course]** OSCEs developed for this course and students are expected to be proficient in them all. At the time of testing, students will be randomized to only one of the five OSCEs. Rubrics for each OSCE are posted on the Moodle course site.

Up to three attempts will be allowed to pass the OSCE with a 10% reduction in clinical grade for each OSCE failure. **Failure to pass after the third attempt denotes course failure and prevents nursing program progression in clinical and lab related courses, including Immersion.**

All OSCEs will be set up and available for practice during Fall quarter Open Lab time (Fridays, 12-8 pm). Practice is **STRONGLY** encouraged however, **Open Lab attendance REQUIRES a reservation on the Moodle site, "SON Open Lab" and is limited to the first 25 students signed up regardless of course..** To register for the site:

1. URL to the collaborative site: https://ccle.ucla.edu/course/view/son_open_lab
2. Click on the "Login" button to login
4. Login using UCLA Login ID (BOL)
5. Click on "Enroll me in this course"
6. The enrollment key is 'nursing' (without the quotation marks)

Pediatrics & OB Nursing Clinical Courses Language for Syllabi:

OSCE (Objective Structured Clinical Exam) Testing: An OSCE is a Skills Test and is an important component of ensuring safe patient care. At the completion of this course, an OSCE will be done as the final course skill examination in the 4th floor lab. There are 3 OSCEs developed for the Pediatric Nursing Clinical course and 3 OSCEs developed for the OB Nursing Clinical course and students are expected to be proficient in them all. At the time of testing, students will be randomized to only one of the six OSCEs. Rubrics for each OSCE are posted on the Moodle course site.

Up to three attempts will be allowed to pass the OSCE with a 10% reduction in clinical grade for each OSCE failure. **Failure to pass after the third attempt denotes course failure and prevents nursing program progression in clinical and lab related courses, including Immersion.**

Should the student fail to pass after the third attempt as noted above, this will constitute course failure *for the applicable course* (Pediatric Nursing Clinical course if a Pediatric Nursing OSCE was failed after three attempts or OB Nursing Clinical course if an OB Nursing OSCE was failed after three attempts). The student will be randomized to one of the three OSCEs for the partner clinical course (Pediatric Nursing if the student failed to pass the OB Nursing OSCE and OB Nursing OSCE if the student failed to pass the Pediatric Nursing OSCE) and allowed to take the OSCE examination to pass the partner clinical course.

All OSCEs will be set up and available for practice during Fall quarter Open Lab time (Fridays, 12-8 pm). Practice is **STRONGLY** encouraged however, **Open Lab attendance REQUIRES a reservation on the Moodle site, "SON Open Lab" and is limited to the first 25 students signed up regardless of course..** To register for the site:

1. URL to the collaborative site: https://ccle.ucla.edu/course/view/son_open_lab
2. Click on the "Login" button to login
